

Добавления в DB Магазин талице Students(стажер)

The screenshot shows the MySQL Workbench interface. The top toolbar includes menus for File, Edit, View, Query, Database, Server, Tools, Scripting, and Help. Below the toolbar is a 'Schemas' pane on the left, which lists various database objects like Triggers, Student, Columns, Indexes, Foreign Keys, Views, Stored Procedures, Functions, Shop, Tables, Buyers, Departments, ProductGroups, Products, Purchases, Sellers, Views, View_BuyersByDep, Stored Procedures, Functions, and sys. The main area displays a SQL query for creating a table named 'Students'.

```
1
2 • CREATE TABLE Students (
3     idStudent INT PRIMARY KEY AUTO_INCREMENT,
4     Surname VARCHAR(50) NOT NULL,
5     FirstName VARCHAR(50) NOT NULL,
6     UniversityName VARCHAR(100),
7     Department_id INT,
8     Mentor_id INT,
9     CONSTRAINT fk_intern_dept
10    FOREIGN KEY (Department_id) REFERENCES Departments(idDepartment),
11    CONSTRAINT fk_intern_mentor
12    FOREIGN KEY (Mentor_id) REFERENCES Sellers(idSeller)
13 );
```

At the bottom, the 'Object Info' pane shows details for the 'View_BuyersByDepartment' view, including its columns: Dept_Name, Buyer_Surname, Buyer_Name, and Buyer_Name.
